

DELIVERING THE POWER OF  
**MOTOTRBO™**

# TrboSENSE

REAL-TIME WATER LEAK  
MONITORING SYSTEM

The integration of sensor, monitoring system, TrboCarE, and radios is a powerful solution that allows users to live monitor their water leaking situation at critical locations such as data centers, equipment rooms, and factories 24/7. With this system in place, users can detect leaks early and take action to prevent damage to equipment and property.

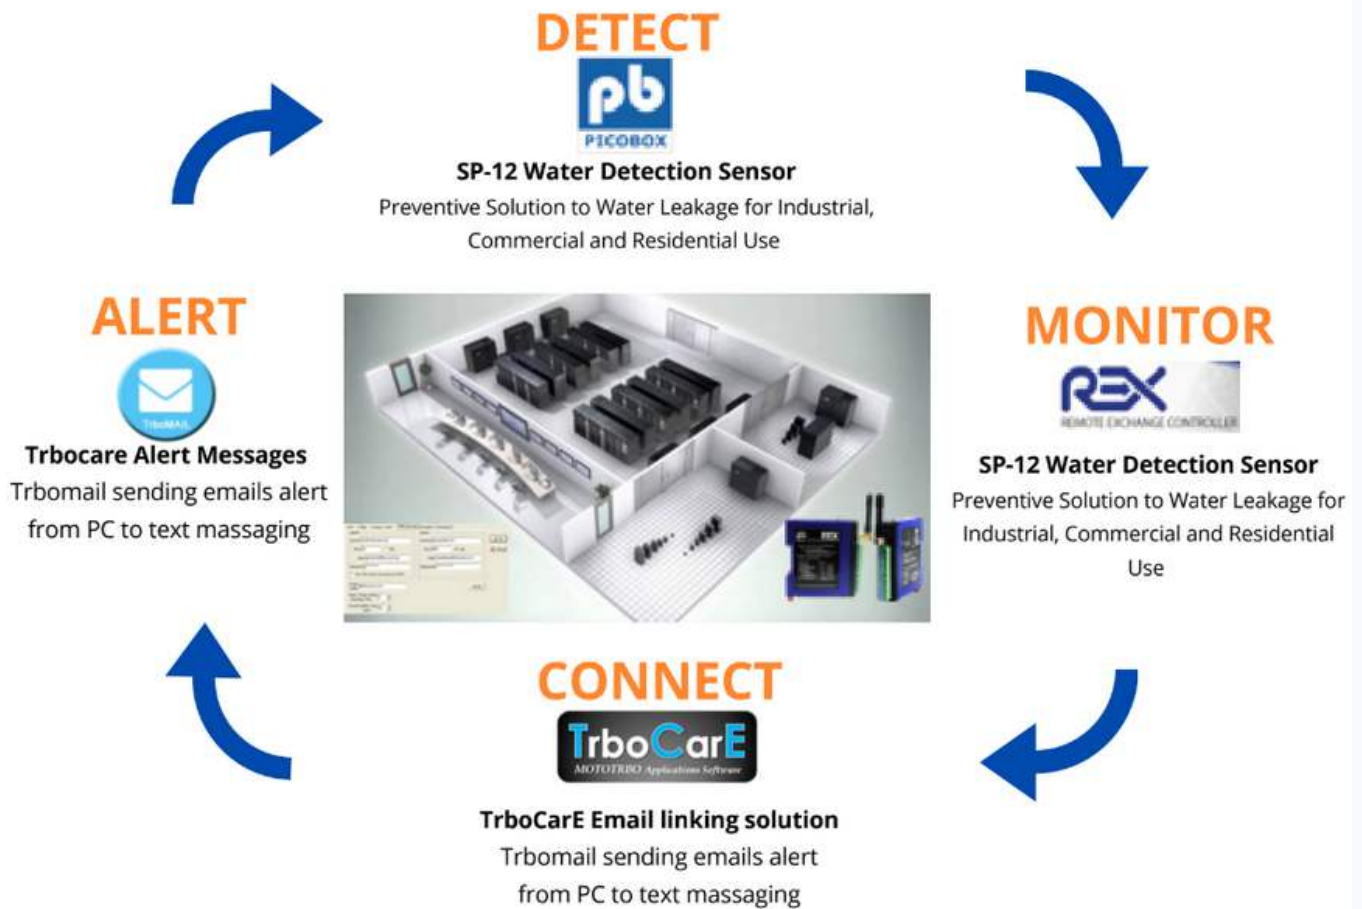

The system includes sensors that detect water leaks and a monitoring system that provides real-time data on the status of the system. TrboCarE is integrated into the system to provide maintenance and support services, ensuring that the system is always functioning at optimal levels.

## Features:

- Integrate with EMS system
- Receive alerts through email and radios message
- Low Cost of Maintenance
- User Friendly
- Efficiency Operation
- 24/7 Operation

## TrboSENSe Workflow

## Communication alternative with radio users outside the radio network through Alarm Alerts

### Technical Specifications

- Type:** Spot water detection probe
- Power:** 12VDC or 24VDC non polarity
- Output Rating:** Normally close (NC) relay dry contact 12 or 24 VDC,1A (non polarity)
- Sensing Height:** 1mm to 6mm (adjustable)
- Dimension:** 24(h) x 44 (diameter)mm
- Weight:** 120g
- Enclosure:** Chrome plated, brass material
- Cord:** 4-core(2 power,2 contact),3 meters
